

# In the Office. At Home. Anywhere.

EVO shared storage with Nomad is a complete multi-site workflow solution.

## A New Way to Collaborate

Whether everyone is in the same room or spread out around the globe, media production teams need a way to share content, collaborate, and secure their work.

Incorporating remote workflows may sound challenging, but with EVO+Nomad – a complete solution for in-house and remote video editing workflows – teams can work together when apart.

## Editing on the Go

Production companies of all sizes need the flexibility to take their creative projects on the go and collaborate across different buildings, cities, or even countries.

Nomad's use of EVO-created proxies made the entire remote workflow process extremely easy.

## EVO+Nomad

EVO is an ultra-fast network shared storage server solution built to make every post-production team more effective.

In addition to ShareBrowser, our easy-to-use media asset management software, every EVO includes Nomad, a subscription-free utility that prepares proxy and source media for remote media production.
